Dear Sir:

We would like to call your attention to our unusual Virginia Seaside Roses. These roses have been grown under what we consider ideal conditions. Our Virginia farms are situated on the narrow strip of land between Chesapeake Bay and the Atlantic Ocean and the heavy night dews, together with the long growing season in that part of the country, combine to produce the largest, most robust rose plants we have ever seen. Do not confuse these roses with ordinary rose plants because they are superior in every way to any you might use for comparison.

Everyone of these roses has five or more canes and we have trimmed them back to 2 feet in height for convenience in shipping.

If you need a few roses for replacements in your garden these are what you want. If you have never grown roses this is your opportunity to start a rose garden with superior plants--Virginia Seaside Roses. For a complete list of varieties see our price list. If you want us to send you one of our rose collections, return the enclosed order form telling us your wishes.

Send in your orders now.

Sincerely yours,

ILGENFRITZ NURSERIES, INC.
